

# Sic Bo

## Description

Ancient dice game mostly played in Asia, in Macau casinos many years ago, but today it is widespread and worldwide known. Available in the famous land-based and in the modern online casinos. The game perfectly appeals to fans of craps and roulette, as the rules are almost similar: the dice are rolled, the players bet on the outcome. Sic Bo is a game of chance without a player's decision-making input.

## Rules

The main object of the game is to wager on the outcome of the three rolling dice. Different chips are used to set the bet value, or the default bet value can be used. Choose the size of the chip, place the chip on the area of the table corresponding to the wanted bet. Click the roll button to see the outcome. Multiple bets for different amounts can be made on the same roll of the dice. If the bet exceeds the maximum payout allowed, the player will receive an on-screen message about the betting limit. Rebet mode is available. All winning combinations light up after the dice roll.

## Betting

While playing Sic Bo various bets can be made. There are a lot of odds and payouts, ranging from 180-to-1.
